Given the difficult financial environment libraries are currently facing, and knowing how much use librarians make of these data reports at budget preparation time, the Data Analysis and Research Unit has input as much information as possible so that you can use it in your budget justifications.

The main difference between these preliminary reports and the final reports that will be published later this year is that data for certain municipalities may not appear, either because MBLC staff were unable to enter those figures for those communities by the cutoff date of February 2, 1990 or because work remained to resolve questions about the information received. To keep production costs down, we have eliminated the detailed explanations of each data element and methodology used. Please refer to last year's final reports if you need this support material.

Please let us know if you identify any discrepancies between the data that appears for your library and what you reported to us in your FY90 Library Incentive and Municipal Equalization Grant application or Annual Report Information Survey, so that we can adjust our data before we publish the final reports.
